CORE COMPETENCIES

Founded in 2016 as part of an undergraduate NASA Space grant, Falcon Photo and Oils provides technical services related to drone systems such as photography, videography, operations, and instruction in both drone operation and art instruction. Research on municipal-level medical drone service integration is published on ResearchGate.net. The pilot holds an FAA Part 107 recurrent drone operator certificate since 2017. The company wishes to integrate creative services at a municipal level.

Past Performance		Differentiators
<p>PASSHE NASA Space Grant in UAV Technology research 2016. Supplied references to Community College of Allegheny County through UAS IPP and UASSC networks in 2017. Researchgate.net: DOI:10.13140/RG.2.2.17477.29928.</p> <p>Instructor or volunteer roles: Bots IQ, Future Pilots League, Verticals Learning Center, The Mon Valley Academy for the Arts, three years at BASD K-12 as an emergency substitute, BAMS long-term art/STEM instructor. Clients include arts, municipal, engineering, event, educational, real estate, and entertainment groups.</p> <p>Falcon Photo and Oils LLC is an agile end-to-end solution for media and municipal services.</p>		<p>Joseph Phillips could train responder staff in Fayette County, PA, one fire station per week. There are approximately fifty-one fire stations in Fayette County, PA. He could train people to fly drones and get recreational flyer certificates through the FAA.</p> <p>Joseph Phillips serves on the Brownsville Art Council as a working artist and collaborator. The artist enjoys creating oil paintings from aerial photographs, working on murals, projects, and art instruction.</p> <p>Falcon P&O blogs weekly about local events, drone tech, science, and art.</p>
